DETAILED ACTION

1. This Office Action is the answer to the Supplemental Amendment (received on 12/10/2003).
2. Claims 106-299 are pending in the present application. Claims 106-279 remain pending and claims 280-299 have been added.

Response to Amendment

3. Applicants elected for examination of claims 106-214 and 232-279, applicants also add new claims 280-299 directed to methods; however, there are distinct species in these new claims (and old claims) that are required to be restricted. One of the purpose of making restriction requirement is to reduce the burden of examining a broad area for the examiner (covering 174+ claims); therefore, merely replacement claims containing different species do not conform to restriction requirements.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 106-214 are drawn to obtaining/providing a digital license for rendering a piece of digital content, classified in classes 705, subclass 59, and 80.
 - II. Claims 215-278 are drawn to a computer-readable medium having stored a data structure, comprising crypto-keys, classified in class 380 subclass 281.

III. The applicants add new claims 280-299 claiming a second server certificate, and a first certificate to validate a server; **having no requirement of negotiations**, these are additional species that need to be restricted.

- Since the above features are critical in claimed invention, applicants are required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicants are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

Upon the allowance of a generic claim, applicants will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicants must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose number is 703-305-4553. The examiner can normally be reached on 7am-3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's acting supervisor, JEFFREY A. SMITH can be reached on 703-308-3588. The fax phone number for the organization where this application or proceeding is assigned is 703-305-7687/703-746-5572.
